Q4	Which of the following ideas is wrong, based on your reading of paragraph 2?
A	The transformation of work is likely to make some workers less suitable for their jobs.
B	The use of smart technologies at work will not affect all aspects of occupations or all work tasks.
C	The use of intelligent technologies in many occupations can lead to job anxiety as some workers may lose their jobs.
D	When intelligent technologies substitute work, humans can still do tasks which require some creativity and physical adaptation.
E	None of the above

Q5	Based on the text, which of the following is an aspect of the 'artificial intelligence society' (AIS)?
A	More job opportunities
B	Better living standards
C	More liberalism
D	Less tolerance of foreigners
E	None of the above

Q6	In paragraph 3, *'a winner-take-all principle'* means
A	only a few workers will do all the tasks at work and the others will remain jobless.
B	the best workers will be rewarded by things such as a pay raise while less competent ones will lose their jobs.
C	a few competent workers will do the most important tasks while less competent ones will deal with less skilled work.
D	the workers who don't fit their jobs are likely to face racism and discrimination at work.
E	none of the above

Q7	Which of the following can be inferred from your reading of paragraphs 3 and 4? In AIS, it is likely that citizens prefer authoritarian leaders because
A	they think they will stop the propagation of AI in the workplace.
B	they think their policies will secure their incomes and living.
C	they think they will slow down the process of work automation.
D	they want them to keep foreigners to less important jobs.
E	None of the above

Q8	One of the *'uncertainties'* which characterize the life of employees in AIS is
A	fear of losing their jobs and income.
B	fear of developing new work values which would affect their life.
C	fear of being rejected by foreigners in the workplace.
D	fear of less skilled workers taking their positions at work.
E	none of the above

Q9	In paragraph 4, *'precarious'* means
A	enjoyable
B	menial
C	tolerant
D	comfortable
E	none of the above

Q10	*'This change'* (Paragraph 5) refers to
A	the idea that in the modern world, smart technologies will certainly make jobs less available for everyone.
B	the change that will affect workplace and employees' behavior and manners as an effect of new work norms.
C	the change that will affect employees' incomes and living standards as a result of using AI at work.
D	the change in the employers' attitudes towards immigrants and less competent workers.
E	none of the above.

Q11	'5% to 47%' (Paragraph 5) refers to
A	the amount of all work that is expected to be performed by smart technologies.
B	the amount of routine work which is normally done in any industry or business.
C	the amount of work which is predicted to be covered by digital technologies, considering only structure work.
D	the percentage by which smart technologies are expected to subsume routine work each year.
E	none of the above

Q12	The author maintains that the workforce is required *'to retrain'* because
A	almost 47% of them may lose their jobs if they are not competitive.
B	they will be required to do menial jobs in the future.
C	their competence might be assessed or evaluated and criticized by their bosses and co-workers.
D	substituting part of their work through the use of AI requires a new worker profile.
E	none of the above

Q13	*'conservation and self-enhancement are more prominent in occupations susceptible to automation'* (Paragraph 6) **can be paraphrased as:**
A	The desire of workers to keep the status-quo and to care more about their own success are aspects which are more noticeable in contexts where smart technologies cannot substitute work.
B	Workers are more likely to conserve and protect their working environment if they are supported by intelligent technologies in their own work.
C	Qualities such as caring more about one's own financial situation and unwillingness to be creative are observed more in jobs or tasks where automation is not possible.
D	Workers tend to be less creative and more focused on their own personal accomplishment when they are doing jobs which are more likely to be affected by automation and digital technologies.
E	None of the above

Q14	Which of the following best summarizes the main idea of paragraph 7?
A	Workers who hold similar values compete over the same job. This competition is beneficial both for workers and the organization.
B	The degree of fit between a worker's values and the job they are doing positively impacts their job satisfaction, which ultimately affects the performance of their working place.
C	Organizations and businesses aim at having some level of correspondence between the occupations they need and the values they expect from workers.
D	The requirements for well-paid jobs change as an effect of AI substituting some work tasks.
E	None of the above
